1.- OBJECT AND SCOPE

This Job Instruction defines the general rules to file documentation in the course of a project within the Piping Department for the following specialties.

- PIPING MATERIALS (Activity 34).
- STRESS AND SUPPORTS (Activity 35).
- PIPING DESIGN (Activity 36).

It aims an order that allow follow the progress of the made and produced documents to the final approval of those ones with all incidences that affect them during the course of the project, trying that each one being traceable and easy to find information.

This Job Instruction is part of the **Intecsa Industrial** Quality System and it has been prepared taking into account the ISO-9001 Code.

There are 4 types of files:

In paper
On the Intranet
In email
On the computer

1.1 Files in paper

The documentation will be filed in folders with dividers AZ clearly indicating the different points for paragraph.

If any of the documents, due to their volume or disposal could not be filed in AZ folders, they would be left on them the appropriate reference and will be archived in file boxes UNI-SYSTEM.

Each AZ folder will initially carry an index of the different sections and each of them will be filed by date and / or revision of the oldest to the newest.

On the back of each AZ folder it shall bear a label with at least the following information:

O.T. nº:
Name of project
Discipline Leader
Section/s content/s

The file of discussed drawings will be done by doing packages of them in MI-44 folders by dates and provenance. All packages will get into UNI-SYSTEM boxes properly identified.

The drawings file will be done in UNI-SYSTEM boxes, along with a list of drawings and documents.

The paper file will be according to the peculiarities of each specialty described in subsequent points of this Job Instruction.

1.2 File on the Intranet

The file on the intranet will be made as described in the general procedure of Intecsa PR-17.

1.2 File in the email

The file in the email will be by specific folders that are called OT number followed by the name of the project (see example).

-**PROJECTS**

-104009-MAADEN
-13243-ENAGAS YELA
-13252 COGENERACION REPSOL C-10

The documentation file within those folders is specifically described in subsequent points for each specialty.

1.2 File on the computer

The file on the computer will be just like in email but all folder structure will be hung of C: \ _MISDOCS \ ....

2.- PIPING MATERIALS:

2.1 File Index

For all forms of filing of the structure will be as follows.

The documents received and generated during the project must be filed in accordance with the following index.

1. GENERAL INFORMATION

1.1 General Index

1.2 Basic Engineering

1.2.1 Supplier specifications

1.3 Project Basis

1.3.1 Contract and scope of supply

1.3.2 Quality Plan

1.3.3 Design Basis

2. PROJECT TRACING

2.1 Situation

2.1.1 General and particular planning

2.1.2 Progress Reports S/SCSI

2.1.3 Parts of incidents

2.1.4 Change Orders

2.2 Meetings and Communications

2.2.1 Meeting reports

2.2.2 Communications

3. DETAILED ENGINEERING

3.1 Information from other departments

3.1.1 Lists

- Pipe List
- Equipment List
- H Items List

3.1.2 PFD'S

3.1.3 P&ID'S

3.1.4 PIPING DRAWINGS

3.1.5 Others

3.2 Specifications and calculations

3.2.1 Piping Specifications

3.2.2 Calculations

3.2.2.1 Thickness calculations

3.2.2.2 Vacuum calculations

3.2.2.3 Test pressure calculations

3.2.2.4 Calculations according to PED/RAP

3.3 Material List

3.4 RM'S of Piping material

3.4.1 RM'S

3.4.2 Data Sheet

3.4.3 Technical tenders and communications with suppliers in proposal time

3.4.4 Tender technical comparisons

3.4.5 Requisition

3.4.6 Communications with suppliers in requisition time

3.4.7 Drawings with comments

3.4.8 Final drawings

3.4.9 Inspection

2.2. File types

There are 4 ways to file:

- 2.2.1 In Paper
- 2.2.2 On the intranet
- 2.2.3 In email
- 2.2.4 On the computer

2.2.1 File in paper

The documentation will be filed considering everything stated in 1.1 and the features described below.

The folders have separators indicating clearly the different points for each paragraph:

1.- General information

2.- Project tracing

For paragraph 3: Detailed Engineering, it will taken into account the following qualifications.

a) It will be filed by independent RM'S, i.e. each RM will have the paragraphs 3.4.1 to 3.4.8.

b) The discussed drawing file will be done making of these packages in MI-44 folders by date and provenance (customer comments, pipes, etc.). All packages will get into UNI-SYSTEM boxes properly identified.

3.- STRESS AND SUPPORTS

3.1 File Index

The documents received and generated during the project must be filed in accordance with the following index.

1. GENERAL INFORMATION

1.1 General Index

1.2 Basic Engineering

1.2.1 Supplier specifications

1.3 Project Basis

1.3.1 Contract and scope of supply

1.3.2 Quality plan

1.3.3 Design Basis

2. PROJECT TRACING

2.1 Situation

2.1.1 General and particular planning

2.1.2 Progress Reports S/SCSI

2.1.3 Part of incidences

2.1.4 Change Orders

2.2 Meetings and communications

2.2.1 Meeting reports

2.2.2 Communications

3. DETAILED ENGINEERING

3.1 Information from other departments

3.1.1 Pipe List
Equipment List
P&ID'S

3.1.2 Piping specifications

3.1.3 Civil work and structure drawings

3.1.4 Equipment drawings

3.2 Own information

3.2.1 Line list: a) Without analysis
With analysis: with calculation
With analysis: without calculation

3.2.2 Pipe calculations & isometric calculations

3.2.3 Supports

3.2.3.1 Plant drawings with support location

3.2.3.2 Isometrics with support location

3.2.3.3 Standard support list

3.2.3.4 Support list & drawings with special supports

3.2.4 MR's of special elements

3.2.4.1 MR's and its documents

3.2.4.2 Technical tenders and communications with suppliers in proposal time

3.2.4.3 Tender technical comparisons

3.2.4.4 Requisition

3.2.4.5 Communications with suppliers in requisition time

3.2.4.6 Drawings with comments

3.2.4.7 Final drawing

3.2.4.8 Inspection

3.2. File types

The documentation will be filed in folders with dividers AZ clearly indicating the different points for paragraph.

1.- General information

2.- Project tracing

If any of the documents, due to their volume or disposal could not be filed in AZ folders, they would be left on them the appropriate reference and will be archived in file boxes UNI-SYSTEM.

Each AZ folder will initially carry an index of the different sections and each of them will be filed by date and / or revision of the oldest to the newest.

On the back of each AZ folder it shall bear a label with at least the following information:

- O.T. nº:
- Name of project
- Specialist responsible
- Section/s content/s

For paragraph 3: Detailed Engineering, it will be taken into account the following indications:

a) The planes from other sections will be filed by making packages of these in MI-44 folders by date and provenance. All packages will get into UNI-SYSTEM boxes properly identified.

b) For drawings and isometrics with support location, we will follow the same procedure as in a).

c) It will be filed by independent RM'S, i.e. each RM will have the paragraphs 3.4.1to 3.4.8.

4.- PIPING DESIGN

4.1 File Index

The documents received and generated during the project must be filed in accordance with the following index:

1. GENERAL INFORMATION

1.1 General Index

1.2 Basic Engineering

1.2.1 Supplier specifications

1.3 Project Basis

1.3.1 Contract and scope of supply

1.3.2 Quality Plan

1.3.3 Design Basis

2. PROJECT TRACING

2.1 Situation

2.1.1 General and particular planning

2.1.2 Progress Reports S/SCSI

2.1.3 Part of incidences

2.1.4 Change Orders

2.2 Meetings and communications

2.2.1 Informes de reuniones

2.2.2 Comunicaciones

3. DETAILED ENGINEERING

3.1 Information from other Departments

3.1.1 Pipe List
Equipment List
P&ID'S

3.1.2 Piping specifications

3.1.3 Drawings from other Departments

3.1.4 Manufacturer drawing

3.2 Own information

3.2.1 Area and plot plans

3.2.2 Underground and air piping plant drawings

3.2.3 Isometrics

3.2.4 Verification isometric drawings

3.2.5 Model Information

4.2 File types

The documentation will be filed in folders with dividers AZ clearly indicating the different points for paragraph:

1.- General Information
2.- Project Tracing

If any of the documents, due to their volume or disposal could not be filed in AZ folders, they would be left on them the appropriate reference and will be archived in file boxes UNI-SYSTEM.

Each AZ folder will initially carry an index of the different sections and each of them will be filed by date and / or revision of the oldest to the newest.

On the back of each AZ folder it shall bear a label with at least the following information:

- O.T. nº:
- Name of project
- Specialist responsible
- Section/s content/s

For paragraph 3: Detailed Engineering, it will be taken into account the following indications:

a) The planes from other sections will be filed by making packages of these in MI-44 folders by date and provenance. All packages will get into UNI-SYSTEM boxes properly identified.

b) Drawings and isometrics produced by plotter or copies, including verification, will follow the same procedures as in a).

c) In general, all documents or drawings that are of polyester or vegetable DIN-A2 and larger, will be filed in drawing cabinets to hang, previously placing adhesive flap margin closest to seal box indicating the project, OT and sheet number. Numerically sorting and separating them according to the order of the index file.

4.3 "Roll board" Table

In the roller table, it will be stuck in numerical order, all the diagrams. There will be a list of names of people that may include comments, situated on the own "roll board".

4.4 IT support

The file of documentation on computer is not the subject of this job instruction and is included in the IT-SO-01, "Operation Guide of CAD stations."

5.- FINAL DESTINATION OF DOCUMENTATION

5.1 Completion of the project

Once the work order (project) has finished, the final destination of the documentation will be in accordance with the procedure PR-17.

5.2 Query file

Of all the final drawings issued and all documentation that may be considered for its uniqueness as for "basic inquiries" will be copied in A3 or A4 and filed in AZ folders with identification labels remaining in the Piping Department, according to Job Instruction IT-TU-07.
